

## Sustainable Procurement Policy

In addition to the Eurostar International Limited Environmental Policy Statement, we are committed to understanding and managing the environmental and social impacts of our operation, including the procurement of products and services. We recognise that improving our environmental and social performance is an ongoing process and that our suppliers are important partners in our journey of becoming more sustainable.

We are committed to:

- Integrating environmental and social considerations into our procurement policies and practices;
- Partnering with organisations that share our values on sustainability;
- Supporting Suppliers to adopt our practices and minimise the environmental and social impacts while supplying products / services both to and on our sites and on their own sites.

Our aims and objectives:

1. Encourage internal purchasers to review consumption of goods / services in order to reduce usage where possible
2. Identify opportunities to minimise our environmental and social impacts through improved product / service selection
3. Improve usage of the procured products / services
4. Engage with Suppliers and work together to achieve our environmental and social goals and share good practice
5. Measure and report Supplier performance on environmental and social impacts.

Our Principles to meet our objectives:

- Focus on Suppliers which have the largest environmental / social footprint and highest risk
- All specifications will include environmental and social requirements
- All procurement processes will have environmental / social evaluation criteria to a minimum of 15% where relevant and suitable
- We will include environmental / social performance measurement into agreements and continually measure Supplier performance where relevant and suitable
- We will develop practical and transparent tools for assessing and providing feedback on environmental / social impacts
- We will annually review this policy and report progress to the Eurostar Management Group

Eurostar is committed to the environment and corporate responsibility, and will remain an industry leader in this field. This commitment is shared by employees with full support from The Board.
